

**POL11 DISCIPLINE THAT RESTORES**

**RATIONALE**

Trinity Lutheran College is a community of learners – students and teachers, staff and parents, who come together for the purpose of learning and teaching. Each individual learner is encouraged to develop their God given gifts and potential in a Christ-centred environment that promotes positive relationships with all in the college community. To facilitate such a community, the college accepts the need for standards to be set and to be accepted by the community. When students experience conflict or disregard and fail to comply with the college’s expectations and code of conduct, the college has the responsibility to intervene to redirect the behaviour and attitude of the student to repair, reconnect and restore relationships. The motivation for this is based on Christian love and is built on the theological foundations of the Lutheran understanding of both Law and Gospel principles (Romans 13:1-5).

**SCOPE**

This policy applies to student behaviour within the college grounds and classroom, when representing the college in public and on camps, tours and school excursions.

**RESPONSIBILITY**

The Principal has overall responsibility for this policy which is administered through the executive leadership team.

**POLICY**

**1. BELIEFS**

- 1.1. The culture of belonging to the Trinity Lutheran College community is to endorse reflective, positive and restorative practices that support relationship building and allow for the resolution of issues in a responsible manner.
- 1.2. At the heart of a restorative culture is a profound respect for relationships and a cultural shift from a punitive to a restorative approach when dealing with disruptive behaviour and conflict which is inevitable in any school community.
- 1.3. Trinity’s whole school approach to management of personal behavior incorporates the practice of regular restating of the high expectations of appropriate behaviour and relational procedures by students, staff and parents in order to maintain a safe, enjoyable learning environment for all.
- 1.4. Trinity also strives to develop positive student behavior, attitudes and effective relationships through creating a learning culture of proactive skilling programs involving students, parents and staff.
- 1.5. As well as this strong emphasis on proactive management, Trinity has responsive management strategies and techniques in place when conflict and behavioural issues occur in the school community. This responsive management is an important part of discipline that restores as it aims to work with the students, staff and parents to actively be involved in the processes of consequences, resolution, rebuilding and ultimately of restoration.
- 1.6. Discipline that restores is based on the belief that:
  - 1.6.1. Trinity has a concern for the development of each student to his/her full potential. This care involves the nurture of each child in terms of his/her social, emotional, spiritual, intellectual and physical growth and positive interpersonal problem solving skills in relation to others.
  - 1.6.2. Discipline that restores is the responsibility of all staff, with members contributing in appropriate ways according to their roles and responsibilities.
  - 1.6.3. Discipline that restores is aimed at acknowledging and responding to all students. All students are different and have unique qualities to be valued and appreciated. Some students require a high level of assistance and support and management processes will vary with each individual.
  - 1.6.4. Discipline that restores is most effective when clear, consistent expectations and practices are communicated and known and a respectful, relational, restorative school culture is evident.
